Detailed Action

The following is responsive to applicant's amendment received July 29, 2005.

Claims 1-8 are pending.

The previous indication of allowability of claims 1-8 is withdrawn in view of the following new ground of rejection.

New Ground(s) of Rejection

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "an effective amount" of the amphetaminil isomer in a pharmaceutical composition. This renders claims 1-8 vague and indefinite because there is no functional language associated with the phrase "an effective amount." It is held that "a claim which designates the amount of an ingredient of a claimed composition as 'an effective amount' is too broad and indefinite if it does not designate the intended effect." Please see Ex parte Dobson et al., 165 USPQ 29 (POBA 1969).

"The primary purpose of this requirement of definiteness of claim language is to ensure that the scope of the claims is clear so the public is informed of the boundaries of what constitutes infringement of the patent. A secondary purpose is to provide a clear measure of what applicants regard as the invention so that it can be determined whether the claimed invention meets all of the criteria for patentability and whether the specification meets the criteria of 35

Art Unit: 1614

USC 112, first paragraph with respect to the claimed invention." Please see MPEP 2173.

Because the limitation does not designate an intended effect and would be subject to subjective interpretation, the Examiner respectfully submits that the metes and bounds of the patent protection desired are unclear, and one of ordinary skill in the art would not be reasonably apprised of the scope of the claimed method.

Conclusion

Claims 1-8 are rejected.
